Fast Track Funding

Streamlining the funding pipeline

Today, you might submit a batch at the end of the day with all of your day's transactions, and though you know the money will eventually be in your account, it won't arrive for another day or two. This kind of delay could be holding you back from managing your business or having full control over your cash flow planning.

Speed up your cash flow by opting for Fast Track Funding. Through this solution, we can fund you within one business day of your batch submission. This service fast tracks your funds so your funds are delivered before you need them.

“

Cash flow in any small business is huge. I know exactly what units I can pay off and what needs to wait. I know exactly where we're at. It gives you a lot more confidence when you come through the door, knowing exactly where you're at in your bank account, you don't have to guess.

— General Manager, Experience Powersports

”

Time is money, so why wait?

The value of time

We understand that your time is valuable, and managing your cash flow can be quite timeconsuming. Fast Track Funding gives you the peace of mind and guarantee that your funds will be deposited when you need them. No guessing the exact hour of arrival or wondering if the funds will arrive before a withdrawal hits your account. We'll take care of the timing so you can focus on running your business.

How Fast Track Funding works

When you opt for Fast Track Funding we put your funds into a specialized fast lane with the Federal Reserve that speeds up the normal funding process. Using this fast lane, you can submit a batch each day before 6 a.m. ET with transactions totaling up to \$100,000 and be eligible for Fast Track Funding. This means that you can submit your batch late Monday night after your business closes, and you'll have your funds deposited into your account by 5 p.m. local time on Tuesday rather than having to wait until Wednesday.
